## TIME TO MARCH

As the Trump 2.0 administration keeps breaking things, from the economy, to education, scientific research, the judicial system, and entitlements, more people are getting restless and ready to show their opposition.

The **Tesla Take Downs** are working. Elon's wealth has plummeted while the number of protests and their attendance are growing.

And on **April 5**, **Hands Off!** will be the first large scale day of action organized by Indivisible and others. A massive display of opposition to Trump 2.0 will show the administration that they don't have a complete mandate and lawmakers that their lack of opposition to the Executive Orders put them at risk of losing their seats.

TWW is trying to have over **50** of its members attend the rally in **San Jose at 12 PM**.

Right now the Trump administration has started arresting, deporting, rendering immigrants, legal or not, for having tattoos, writing op-eds they don't agree with, protesting for causes they don't like. All that without the due process that is due to every one on US soil. They are upping charges of vandalism against Teslas to domestic terrorism, and threatening citizens of expulsions from the territory.

In this time of aggressive reaction to protests, we need to be careful with our data.

On April 9, **John Morrell** will present the first of a two part session on **digital security**.

This session will be an introduction to digital security concerns and ways to address them. We'll start by reviewing common digital security concerns and then move into explaining some of the more common tools and techniques for reducing risk. We'll end with some resources for individuals to further explore.

If there is sufficient interest, we can develop plans for follow up meetings on particular topics in smaller groups.

This will be a hybrid meeting, both in person and on Zoom.

**April 9, 2025 - 7 to 9 PM**

@ Ann's - 173 Longmeadow Drive, Los Gatos

Sincerely,

**Karla & Sylvie**
